

Thank You Letter

Dear Shennongjia National Park Administration,

As the Third China-UK National Parks Collaboration Workshop successfully concludes, I would like to express my sincerest gratitude, on behalf of the British Consulate-General in Wuhan, for your strong support throughout the event.

The success of this workshop would not have been possible without the solid support your bureau provided in terms of coordination and arrangements. Party Secretary Zheng's opening remarks was insightful and visionary, profoundly articulating the significance of China's national park system development and pointing the way for UK-China cooperation to move from experience sharing to project implementation. Your bureau's introduction on the national park development and experience of best practices laid a solid foundation for deepening ecological cooperation between the UK and China.

We sincerely look forward to continuing our collaboration with your bureau in the future, transforming the consensus reached at the seminar into practical outcomes, and jointly contributing more "China-UK smart solutions" to global ecological governance.

With best regards,
